Highlights of TexJet® shortee²

Superior Quality

Crisp detail and vivid color to impress any client.

TexJet® shortee² print head uses the smallest drop size of 3pl to achieve precision to detail and allow photorealistic quality prints that will make your products stand out.

Easy to use and maintain

Minimal training needed!

Quick garment loading with auto height adjustments, platens that snap-on magnetically and pop-up guiding messages on display are some of the features that you will love.

Increased effectiveness with Quick ROI

Print more and spend less!

TexJet® shortee² comes with **3 years** limited warranty (1 year on printhead) at an **affordable price** to help you achieve the **fastest ROI** and ensure the safety of your investment.

Which type of ink do you need?

- **DuPont Inks:** CMYKW. This industry standard provides reliable, top-notch ink for impeccable print-head performance and solid repeatability.
- **Power Inks:** CMYK. This option provides increased color vibrancy, 30% more wash fastness, and shorter fix times (120 sec on dark garments, 60 on light), great for high-volume production and daily printing.

What ink configuration should you use?

You can switch between ink configurations at any time.

- **CMYKW:** Standard for both dark and light garments to give you the most options on a wide range of garment colors.
- **2xCMYK:** 40% faster printing on light garments or prints not requiring white ink, making it ideal for high-volume production runs.

How will you pre-treat your fabric?

• **For dark-coloured garments:**

- **P5001:** Industry's standard to achieve high print quality with rich, vibrant colors and soft hand.
- **P5003:** This solution offers faster white ink drying, 50% shorter fix times, and 30% higher wash fastness. It's also optimized for tunnel drying.

• **For light-coloured garments:**

- **Polycoating:** This option, for light-colored cotton and polyester, improves color vividness and print detail accuracy. It also increases wash fastness by 30%.

Which platens will suit your needs?

Be ready to print on anything!

TexJet® shortee² has 6 platen options that snap on magnetically and range in shape and size from 15x15 cm (6x6 in) to 32x45 cm (12x18 in) *. Plus, the adjustable frame systems keep thin and thick garments flat, offering the best printing ability.
